

# HISTORY

v0.940 - beta #4 release 04.jan.99

----- **PasPDF** = (Pascal) **TP7/BP7** (Delphi) **D1/D2-D4** (C++Builder) **C1/C3**  
.. "Symbolic Font" added (pdfSign.pas) \*cool!\*  
.. "Outline" (Bookmark) added (supports single level only)  
.. Powerful "Columnal output" (multi-columns/rows and border) added \*cool!\*  
.. "Page Formating Control" (PageSetup/PageMode/PageLayout) control added  
.. Application:"txt2pdf"  
    \* "pdf\_textcontrol" is wrongly placing for parsing "Command Lines",  
      change to "pdf\_systemTextControl" insteads.  
    \* move some "text parsing" statements into "PdfCmd.pas"

v0.931 - beta #3 release 31.dec.98

----- **PasPDF** = (Pascal) **TP7/BP7** (Delphi) **D1/D2-D4** (C++Builder) **C1/C3**  
.. fix bugs in "PDF Styler Control"  
    \* Text Parsing error in pdfCmd.pas -> "PDF\_AdjustTj", line #504-#507  
    \* "<<" will not treated as "<"

v0.930 - beta #3 release 30.dec.98

----- **PasPDF** = (Pascal) **TP7/BP7** (Delphi) **D1/D2-D4** (C++Builder) **C1/C3**  
.. fix "Font Style" bugs in "PDF Styler Control"  
.. Font Color added - < font color=? > or < font color=#rrggbb >  
.. Page Break added - < !!PAGEBREAK -- >  
.. Page Title on each written page  
.. WordWrap reset to "False" for "PDF Styler Control"  
.. failure in supporting "International Characters" - confirms later

v0.920 - beta #2 release 25.dec.98

-----

.. Great news ! fully compilable for Pascal (TP7/BP7) and Delphi (1-4)  
.. Extended Documented Info.  
    Subject / Author / Keywords - added  
.. Form Feed Control  
.. Encoding Declaration - MacRoman / WinAnsi / No  
.. Types of Font Declaration - Standard 14 Fonts / TrueType  
x. International Characters (postpone / may not be supported)  
x. PDF Styler Control (serious bugs found and may be fixable in  
    next few beta release v0.9xx)

\*note\* since serious bugs found in "PDF Styler Control", this beta still  
    release-out today - 1st release of "PasPDF" library

v0.910 - beta #1 release 17.dec.98

----- Non-PasPDF = TP7/BP7

.. pre-initial release  
.. mostly based on [ text2pdf.c ] v1.1 -by- Phil Smith 11.oct.96  
.. a few functionalities supported, please refers [ README.TXT ]

\*\*\*\*\*

v1.0xx to v1.4xx - proposed functions and release date : jan-mar'99

-----

.. delphi component (DOS=TP7/BP7 Win16=D1 /Win32-bit=D2/D3/D4 only)  
.. visual application - txt2pdf.exe (with source code)  
.. <freeware> for non-commercial use  
.. minor donation needed for delphi component with source code

v1.5xx - proposed functions and release date : apr-jun'99

-----

.. graphic commands supported (like MetaFile)  
.. zlib deflate compression supported, LZW not supported - UniSys patent  
.. embedded pictures supported (JPEG/GIF?/PNG?, importable: BMP)  
.. QuickReport Export Filter
