

**Take the mortal struggle
out of setting up and
playing your computer games.**

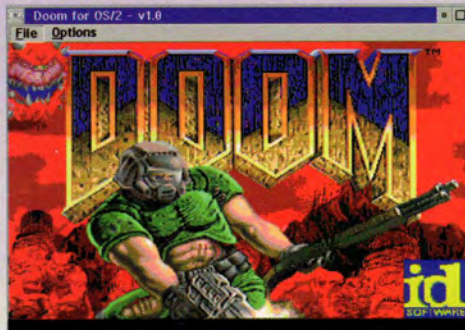

Introducing OS/2 Warp.

Give your computer better brains and a nicer face.

Human beings may be stuck with the brains they're born with, but your computer is not. You can change its operating system — the brains behind the games. So load up OS/2® Warp and play more games ... better games. You'll like its action, eye-popping graphics and personal look, too.

Take more journeys.

If, right now, you have DOS or DOS + Windows™ on your machine, you can actually add OS/2 and give your system a boost. Then, when you're in the mood, flip the switch. Fasten your seat belt. Point and click. You're ready to play. You'll have more fun with your DOS, Windows and OS/2 games.

Battle the demons of the netherworld with *Doom for OS/2**.

Fight more warlords.

OS/2 not only gives you more choices, but *better* choices. Like *Doom for OS/2** and *SimCity Classic for OS/2*. You get support for your audio, video and image adapters right out of the box. And adding your CD-ROM or sound card is effortless. You can start the action without a fight.

*Planned availability 12/94

Build more cities.

OS/2 Warp will automatically configure most games, so you don't have to. Which means they'll give you more exciting views and faster response to controls, play better, do more (by taking optimum advantage of OS/2's 32-bit, priority-driven multitasking), and won't bring your system down.

Design and build the city of your dreams with *SimCity Classic for OS/2*.

Get blown away!

Get more than just games from your computer.

Drat! Life isn't all fun and games. There's work. And household chores, like managing a budget. Let your computer pick up some of the slack. OS/2 Warp comes with a BonusPak for OS/2 — *at no additional charge* — with productivity tools that you can use right away. And it'll help you hone your social skills, too, with its easy access to the Internet.

A word processor, spreadsheet, fax and more.

OS/2 Warp may very well be the only "serious" piece of software you will ever need to buy. That's because the BonusPak for OS/2 includes a full-function word processor, spreadsheet program, Personal Information Manager (including a calendar, phone book and to-do list), FaxWorks™, Person to Person™ desktop conferencing program and more. These tools alone make OS/2 Warp worth much more than its \$89 price tag.

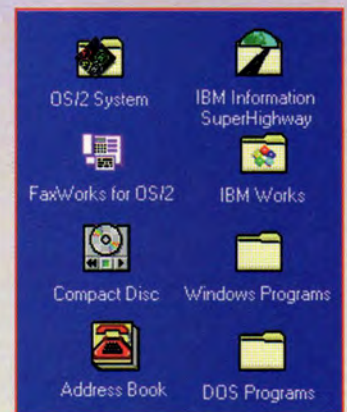

A graphical drag and drop Workplace Shell.

Start every computing session in our award-winning Workplace Shell®. It's a whole lot easier than navigating DOS command

prompts, and gives you much more control than Windows. Set up your workplace any way you like. Want to move a document from one file to another? Just drag and drop. Have applications or games you use all the time?

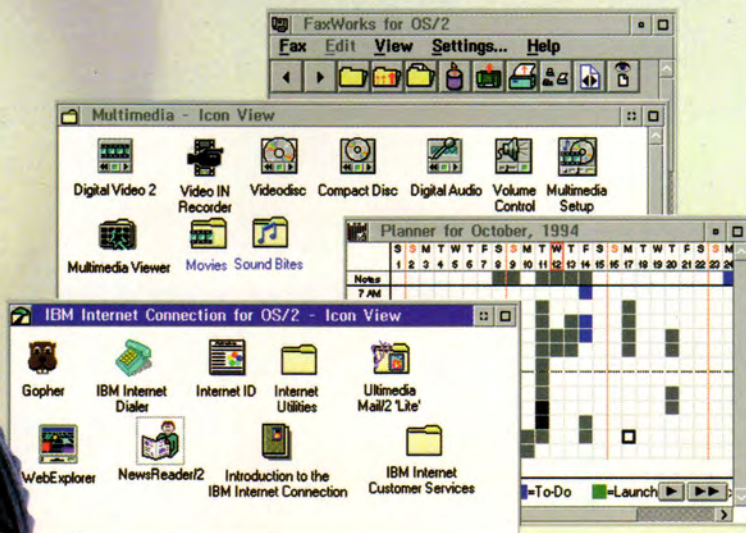

Put their icons onto your launch pad and blast off with a single click.

More choices. A lot more.

Remember, with OS/2 you can run DOS, Windows *and* OS/2 applications.* Which means you can open your computer to new possibilities ... get it doing more of what you bought it for. Don't put it off — order OS/2 Warp Version 3, today. Call 1 800 3IBM-OS2.

* You must also have Windows installed to run Windows applications.

Be the master of your machine.

Make it respond to your every command.

Isn't it time your computer did what *you* want it to do, not the other way around? With OS/2, you are the taskmaster, your computer the servant. You can focus on what's important: playing your games, getting things done or going where you want to go.

One-click access.

Gopher

To the
Internet 

You don't have to read a 500-page book to figure out how to get onto the "information superhighway." All you need is a modem and the BonusPak for OS/2. Just point, click and let the graphical interface steer your way. You can surf the Internet, take advantage of the IBM bulletin board and much more.

**Have more fun.
Get more done. Order today!**

Get OS/2 Warp and take control of your computer. Play more games. Be more productive. Move faster, with more stability and more power. OS/2 is right for you, and available right now for just \$89. Order today!

System requirements: Intel® 386 SX-compatible or higher based personal computer; 4MB of random access memory (RAM); 35-55MB free hard disk space; 1.44MB 3.5" diskette drive; VGA video support; IBM-compatible mouse; multimedia-ready systems for sound. Microsoft® Windows Version 3.1 or 3.11 is required for Windows applications support. Windows for Work Groups Versions 3.1 and 3.11 are supported in the same manner as Windows Versions 3.1 and 3.11. BonusPak for OS/2 requires up to 30MB additional free space (user-selectable) and 9600 baud or higher modem for online access.

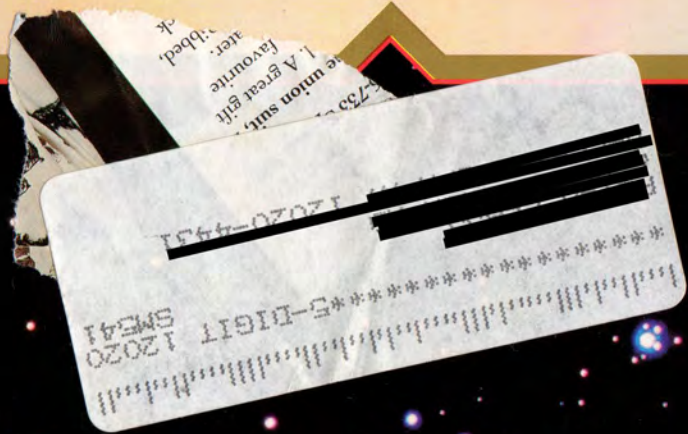

Don't let the 640K monster
doom your games any longer!

There's a sinister creature called the 640K memory barrier blocking your access to some of the hottest games. But add OS/2, and obliterate the barrier. That's because OS/2 actually makes better use of your computer's memory. Gone are multiple configuration files (*config.sys*). So the victory is yours. You can play games you once could not.
